In Area 10 this term we have been designing our very own ‘Information Packs’ to present to potential purchasers who may be interested in owning their very own special monsters. Information packs contain details such as the weight, height, age and physical features of the monster, as well as what they look like during Summer, Autumn, Winter and Spring. We have created our very own tri-fold information brochures and provided readers with details on where the monster likes to live and how they go about scaring their clients. We give 3 reasons as to why people should buy our monsters and have finished off with a persuasive writing essay, just in case people weren’t already convinced!

Our information packs are bright, colourful, interactive and very entertaining. We have really enjoyed our time spent on making these packs.

If any students are interested in viewing them, we will have them on display in Area 10 this term and you are welcome to come and visit Area 10 on Mondays at lunchtime while Mrs Craig is running Lunch Club.

In the meantime, please enjoy some pictures of some of the ‘Information Packs’ that Area 10 has put together.
